

## Rich Notifications

mydlink lets you see and do more, right from your lock screen.

### Unlock the Full Story Without Having to Open the App

The new and improved mydlink app now comes with Rich Notifications. Alerts from mydlink devices come with richer contextual details, and appear directly on your lock screen — no need to log in to the app to view them. We've also added quick action buttons, so you can act on what you're seeing immediately and respond to any situation in your home faster.

## Hear, and Be Heard

The Full HD Outdoor Wi-Fi Spotlight Camera has built-in two-way audio, so you can hear live audio from your camera's live view and speak through your mobile device to your family members or furry friends nearby. It also lets you set volume thresholds to determine the sound level required to trigger an alert, great for detecting the sound of an intruder, or the cry of a baby.

## The Future of Wireless Encryption

One of the biggest concerns with IoT devices and Wi-Fi networks is privacy. Selected mydlink cameras feature the latest industry-standard 128-bit encryption, which is the most advanced security standard available and begins a new era of wireless encryption, ensuring greater privacy throughout users' devices and networks.

**The Future of Wireless Encryption**  
Latest 128-bit encryption will replace previous industry-standard encryption on Wi-Fi devices

**Stronger Encryption Algorithm**  
More resistant to hacking and cracking

**Enhanced Protection from Brute Force Attacks**  
Stronger protection for users against password guessing attempts

**Individualised Data Encryption**  
Creates stronger and more unique encryption keys for each device

**Forward Secrecy**  
Cannot use a cracked password to decrypt previously-intercepted traffic

**Futureproof and Compatible**  
mydlink devices will not be the ones holding your network back with the previous encryption protocols

## Works with the Google Assistant and Alexa

Use voice controls to stream live video from your camera to Amazon Fire TV, Echo Show, Echo Spot or Google Chromecast. FINALLY. A way to monitor everything you care about (without lifting a finger).

Ok Google, show me the living room camera on the TV

"Alexa, show me the nursery camera"

"Alexa, show me the latest activity from the toy room"

## All Your Footage Saved to the Cloud

Worried that you'll lose all your Camera footage? Don't sweat it. The mydlink Full HD Outdoor Wi-Fi Spotlight Camera lets you record snapshots and video clips to the Cloud or download footage to your mobile device from anywhere, anytime through the Internet.

## Smart on its Own, Genius with mydlink

Extend the capabilities of your mydlink Full HD Outdoor Wi-Fi Spotlight Camera when you combine it with other devices in the mydlink family. With an extensive range of Wi-Fi Sensors, Smart Plugs, and Cameras, you'll find something to fit your smart home automation and surveillance needs in no time.

## Get More Control with mydlink

The new mydlink app is smarter, simpler and more compatible. Manage your security Cameras, Smart Plugs, and Sensors, all in one place, right from your smart phone or tablet.

# mydlink Full HD Outdoor Wi-Fi Spotlight Camera

## DCS-8630LH

### Home Surveillance, Illuminated

Night-time monitoring is now easier than ever thanks to the DCS-8630LH. An integrated spotlight provides colour night vision in complete darkness and its 150° wide angle view captures stunning Full HD 1080p video at 30 frames per second (fps) day or night. The perfect outdoor companion for modern smart home surveillance.

# 150°

Diagonal Range

# 1080p

True Full HD - 30 fps

## Why You Want It

### 400 Lumen Spotlight

Built-in LEDs cast a bright light over the Camera's view

### Colour Night Vision

See and record full colour video in low-light conditions with colour night vision

### IP65 Outdoor

Certified IP65 weatherproof for outdoor installations

### Advanced Motion Detection

Passive Infrared (PIR) sensor for highly accurate motion detection that reduces false alarms, even in complete darkness

### AI-Based Person Detection

Delivers smarter, more relevant alerts

### Glass Break Detection

AI algorithm detects the sound of breaking or shattering glass

### Built-in Speaker/Siren

100 dB speaker/siren to scare off intruders or alert you to a detection

### Rich Notifications

Receive a snapshot and take action from your lock screen with a tap to call a designated contact

## See More in The Dark

Low-light environments are no match for the DCS-8630LH's colour night vision capabilities. Get round-the-clock monitoring with its 400 lumen spotlight illuminating complete darkness. Activate the spotlight manually or automatically when triggered by motion. Now you can see what's happening outside your home, even in the dark of night.

Without Enhanced Colour Night Vision

With Enhanced Colour Night Vision

### AI-based Person Detection

The DCS-8630LH comes with edge-based person detection which intelligently identifies human motion, minimising false triggers and alarms. A passive infrared (PIR) sensor further reduces false triggers by using infrared heat technology to pick up motion caused by humans or animals. No longer will you receive notifications every time a bug flies by or trees sway in the wind. Only capture motion that matters, as it happens.

### Glass-Break Detection

Glass-Break detection adds a new line of defence to your home surveillance. The DCS-8630LH is one of the world's first Smart Home Cameras with an integrated glass break detector. If glass is broken, you'll be notified immediately to keep your home and your loved ones safe if potential danger is near.

### Outdoor-Ready

The DCS-8630LH holds its own against the heat, cold, rain or sun. With an IP65 rating on both the camera and its 7m worth of cabling, you can rest assured that your surveillance won't go down even if the power cable is exposed to the elements. Likewise, dirt and dust are no match for the DCS-8630LH – you'll get the same Full HD video quality, from dusty driveways to sandy desert surroundings, every time.

### Extreme Weather Endurance

The DCS-8630LH can withstand the harshest winter temperatures from down to -25°C (-4°F) all the way up to blistering summer heat waves of up to 45°C (113°F). Check what's happening in your outdoor areas without worrying if your camera has frozen over or been damaged by heat.

## AI that's Closer to Home

Other Cameras run their Artificial Intelligence on external cloud subscription plans. The mydlink Full HD Outdoor Wi-Fi Spotlight Camera runs all that intelligent goodness natively on the camera.

This keeps the AI closer to home, so you don't have to pay extra fees just to enjoy AI and IVA.

No extra fees

Less cloud storage needs

Less network loading

## ONVIF Compliant for the Prosumer in You

Select mydlink Cameras support ONVIF Profile S. ONVIF compliant products are designed to interoperate seamlessly with each other, meaning that with your mydlink Camera you can easily record video streams to your ONVIF compliant NVR, VMS, or NAS system for centralised viewing or continuous, 24/7 recording. Not only that, but you can also use an ONVIF compliant device to control your Camera's settings without using the mydlink app.<sup>1</sup>

## mydlink Smart DIY

Building a fully-automated, DIY Home Security System? Make it easy with the mydlink Full HD Outdoor Wi-Fi Spotlight Camera. Just add on compatible mydlink Smart DIY Sensors, and this Camera's built-in Smart Hub turns into a brain that links them all up into a complete security system. So anytime a Sensor detects motion or an open door/window, you'll get an alert on your mydlink app.

Build a fully-customised, DIY Smart Home Surveillance System today.

## Build your Dream Smart Home with mydlink's Smart DIY

mydlink Smart DIY takes your Smart Home experience to the next level with devices using Zigbee™ technology.

<sup>1</sup> Once configured to work with ONVIF Profile S, there is no guarantee that this device will continue to function normally with mydlink, the Google Assistant, or Alexa. It is recommended that once set up for ONVIF operation, no other apps or ecosystems are used to control it.
