

## Ibis Styles Hotel, Brisbane

A great example of an efficient Enterprise Wireless Access Point Solution provided by D-Link and Fredon

*D-Link Solution installed by Fredon covered all of Ibis Styles Brisbane's key requirements including being reasonably priced and comprehensively feature-rich... delivering a speedy, reliable solution.*

— Ibis Styles Brisbane

### Background

#### Organisation:

Located at the heart of the Brisbane CBD, the 368 room Ibis Styles Brisbane features uninterrupted views of Brisbane River and the South Bank cultural precinct. For total comfort Ibis Styles Brisbane provides a range of guest services including 24 hour Reception, meeting spaces with outdoor terrace, Wi-Fi connectivity throughout, SmartTV and media panel in each room.

#### Overview

D-Link worked with our trusted partners Fredon on this key project to design and install Enterprise Access Points into the new hotel. Fredon is a leading supplier of communications, electrical, data and HVAC services to government, large corporations and the industrial and construction sectors. Fredon relied on D-Link for advice on correct Access Point planning and placement prior to installation and on Pacific Datacom for local stock and reliable support. Post installation Fredon relied on D-Link for on-site configuration.

#### Challenge:

As the Ibis Styles Brisbane was a new purpose-built hotel it brought with it all the challenges of a large scale roll-out including meticulous planning and logistics having to integrate seamlessly with technical support and customer training. The speed of deployment was also a key factor.

### The Solution

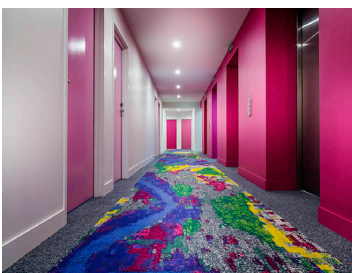

Access Points were installed on each level of the hotel and a DWC-2000 Wireless Controller was installed into the communications cabinet on the services floor. It was very important to the hotel that all of the equipment installed came from a global brand with an excellent and proven reputation for quality and efficiency.

### The Outcome

Fredon successfully installed a D-Link solution that covered all of their key requirements. This included being reasonably priced yet comprehensively feature-rich, having a Systems Integrator with local presence, teamed with a reliable vendor, high quality distribution support and service and a speedy delivery of the solution.

### Products integrated in this solution include:

	<p><b>155 x D-Link DWL-6600AP</b> Unified Wireless N600 Dual Band Concurrent Access Points</p>
	<p><b>1 x D-Link DWC-2000</b> Unified Wireless Controller for up to 256 APs (64 AP License Included)</p>
